

VDV TOKEN

WHITE PAPER

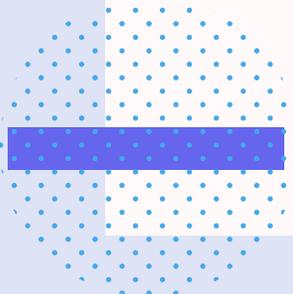

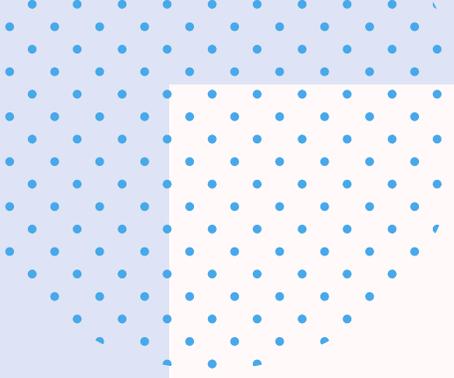

DISCLAIMER

All information provided in this whitepaper and on the website (vdrvtoken.io) is provided solely for educational purposes and should not be perceived as financial advice.

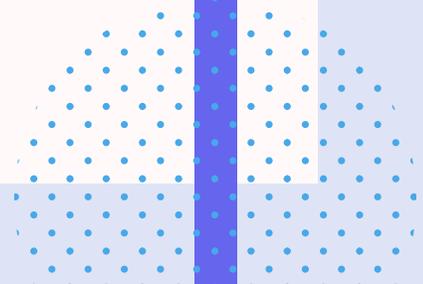

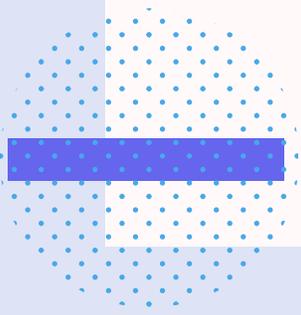

Trading cryptocurrencies/digital assets is a high-risk, high- volatility activity. The readers of this whitepaper should never put more resources into cryptocurrency buying than they can stand to lose. Before investing in this or any other cryptocurrency project, the reader should always seek professional investment advice.

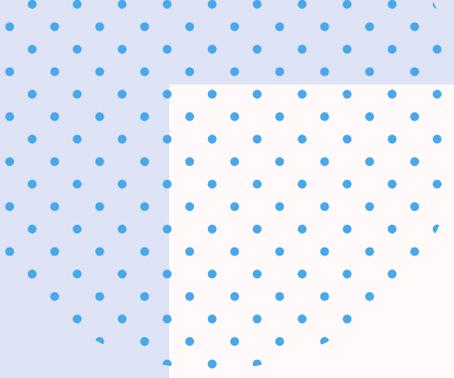

ABSTRACT

This white paper explains how the VIRVIA platform presents the VDV token, its mission, its features, its vision, how it works to better the programmable money and help the shop and shoppers, buyers and investors would be no drawbacks and loopholes for our users.

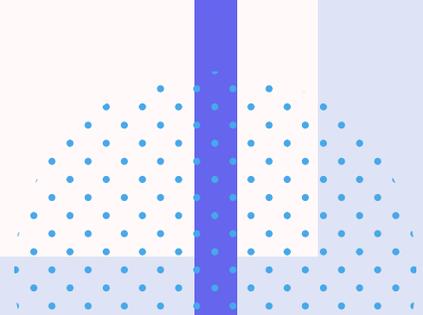

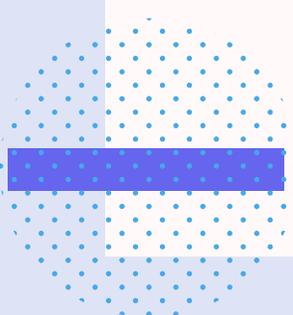

OPPORTUNITY

We feel that Programmable Money is on the verge of becoming widely used. According to the most recent Global Findex Database, there were 1.7 billion adults still unbanked in 2017. That figure was 2 billion in 2014. People don't have access to essential financial services, which is one of the main reasons why Programmable

Money is on the verge of becoming widely used or that they are having troubles with the existing banking in their area, such as high FX rates, savings and investment challenges, or simply basic transaction fees. This issue varies by market and has a wide range of consequences. To avoid such setbacks, we provide our consumers with a token that allows them to both invest and save simultaneously.

INTRODUCTION

The VDV token is more than just a way to spend cryptocurrency. The company aspires to link the world's old money with the future of Programmable Money, which allows people complete control while also educating and safeguarding clients. The existing VDV payment system consists of the VDV, which is a Binance Smart Chain-based digital currency or token.

A group of entrepreneurs founded VDV to develop a payment system that could be used on various online stores, allowing consumers and retailers to save money.

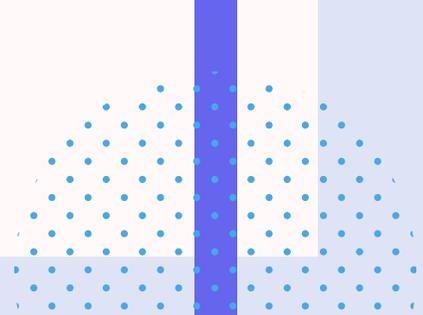

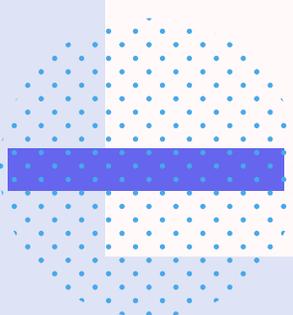

VDV TOKEN is a cryptographic money token on the Binance Smart Chain, an open-source blockchain convention governed by a set of rules devised by its chosen agents to automate specific actions without the use of delegates. Because there is no maker, showcase, or financial backer wallet, users can buy all tokens on pancake swap.

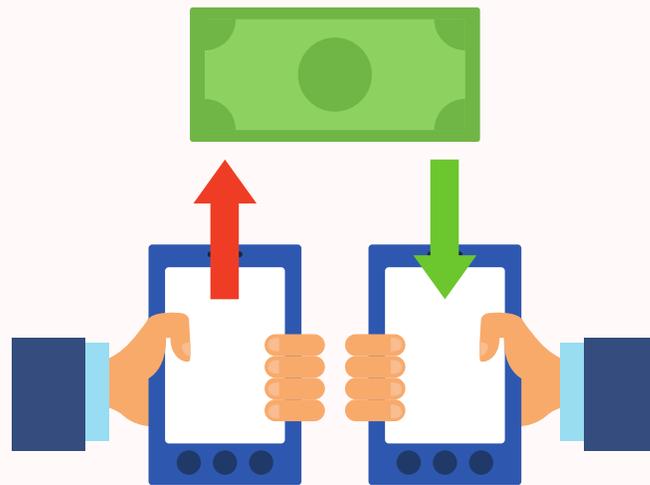

OUR VISION

VIRVIA envisions a future where Programmable Money is created by and for the people. When blockchains power financial networks and all money becomes digital, everyone will have equal access to the global economy, regardless of where they live. They will be able to send, invest, earn, and save money in any currency or assets they like. They will be able to access a world without borders. This will be achievable because entrepreneurs would have complete control over their money, allowing them to build new services and overhauling outmoded financial infrastructure.

Our mission is to provide value to our clients by offering discounts through the usage of the VDV Token, which is widely utilized and accepted in the market.

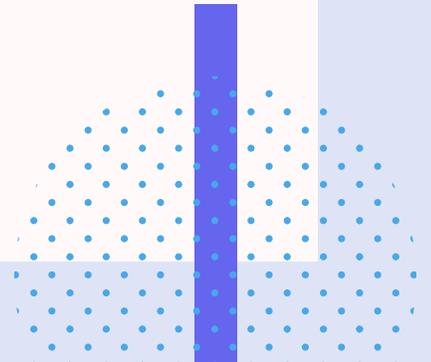

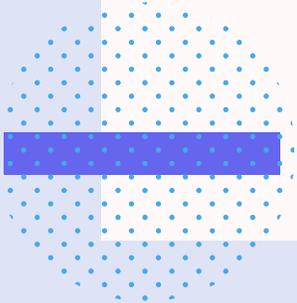

As a result, a truly global, digital economy will emerge, open to all and built on programmability. In the same way that quick invention drove down prices when individuals first connected to the internet, rapid innovation will drive down costs. Not only will future money be completely digital, but it will also be programmable.

OUR MISSION

Our goal is to become one of the most trusted Crypto Tokens, making them the first choice of retailers and consumers for the value they provide. We want to fulfil our objective of a healthy climate by providing a secure environment for clients by maintaining the cost of our token and the incentives for our symbolic holders. We are not hesitant to make modifications to our agreement for the greater good of our community. Our aggressive marketing efforts back up our efforts to build trust and resolve issues between the central and individuals in our biological system to newcomers and substantial local community contributions to build trust and resolve any issues between the main and individuals in our natural community system.

VDV ECOSYSTEM

We imagine a future in which VDV TOKEN provides users with access to whatever asset they desire. We can imagine a future where cryptocurrencies, stablecoins, precious metals, loyalty points, and air miles can all be accessible, used, and quickly transacted on a worldwide scale, thanks to tokenization, which is a significant driving factor in our sector. The VDV TOKEN entitles you to possible savings at over 50,000 stores worldwide. We believe that spending cryptocurrency should be straightforward. Users only need to replenish their wallets with tokens. The VIRVIA Ecosystem considers the token's expendability to be as advantageous as feasible.

BUY VDV TOKEN

VDV Token can be purchased directly from below exchanges.

 **PancakeSwap**

 **VINDAX**

 **BabySwap**

FUTURE OBJECTIVES

The highest stabilized token holder, who will hold or sell the most outstanding amount of tokens with the same values as our users, and our flagship PancakeSwap pool, which a DAO system will manage (as an open-source blockchain protocol governed by a set of rules, The trading fees earned can be divided or used for token buybacks. They are formed by their elected members and automatically execute specified operations without the need for intermediaries.
